# 1. the group

**1.1. our history**

**1.2. our values**

**1.3. relevant data**

# 1.1. our history

**With more than 60 years' experience, the companies in the Grup Heracles have actively participated in the development of Andorra.**

In 2005, several Andorran companies within the construction sector decided to come together to form a single group. **Grup Heracles is the result of that merger, bringing together some of the most important companies in construction and related services in the Principality of Andorra.**

The combined track records and extensive experience of each company has provided Grup Heracles with a history closely linked to the development and transformation of Andorra over the past 60 years. For example, Grup Heracles and its subsidiaries have carried out major infrastructure works in Andorra and have provided a range of services essential for the current shape of the country's economic life, within a particularly difficult environment due to the country's mountainous topography, a fact that has allowed it to achieve excellence in all types of project.

Thanks to this accumulated experience, Grup Heracles has the necessary qualifications to offer comprehensive solutions for extremely technically difficult projects and has become a benchmark both in special projects and in the construction of complex infrastructures in mountainous environments.

Very aware of the need to protect the environment since it began its activities, Grup Heracles has also been committed to the management and processing of construction waste and includes all the activities that form the sustainable construction cycle.

The development in the environmental sector has been remarkable, and since Grup Heracles currently manages all types of waste (solid, urban, collection and selection, special, oils, sludge, rubble and waste from WWTP), this has seen it become a company of reference and a leader in waste management in the Principality of Andorra.

# 1.2. our values

## company culture

## corporate social responsibility

**Grup Heracles maintains a strong commitment to Andorran society and supports social and sporting projects related to its company culture.**

### mission

We carry out our business within the construction sector, including civil, building and environmental projects as well as in related services.

With a competitive, innovative, comprehensive, professional and socially responsible offering, our group seeks to ensure the satisfaction of every public or private entity and of every person with whom it interacts, both internally and externally.

### vision

We carry out our work with the desire to be a benchmark group within Andorra, managing successful and competitive businesses thanks to a professional team and some united and committed shareholders.

Our goal is the constant search for excellence, competitiveness and sustainability in all the activities we carry out.

### values

Our business culture is based on a sustainable business model focusing on our fundamental values: the unity of the family owners, the desire for continuity, financial prudence, austerity, discretion, humility, respect, honesty, transparency, perseverance, effort, excellence in work and professionalism.

**B**

eyond the achievement of our economic objectives, Grup Heracles promotes a whole set of actions with the aim of having a beneficial and lasting impact on Andorran society.

In order to identify the needs to be met and to determine the most appropriate actions and measures, Grup Heracles maintains a permanent dialogue with various community representatives.

To fulfil its strategic CSR policy, Grup Heracles makes various contributions to non-profit organisations dedicated to the protection of the most disadvantaged and carries out various social actions, such as the collaboration with Càritas Andorrana to manage the collection of clothing.

Since 2017, Grup Heracles has also been part of the network of inclusive companies with the aim of facilitating the integration of people with disabilities in the workplace.

Finally, Grup Heracles' commitment to Andorran society is made manifest with the sponsorship of sporting activities, either by supporting sports clubs or participating in relevant events.

# 1.3. relevant data

**14** specialist and complementary companies

All the companies in the group have highly specialist human resources (400 people) and a fleet of approximately 240 vehicles, as well as the technical means required to guarantee that the works are carried out with the maximum excellence in terms of quality, cost and time.

## Public works and construction

## Waste

## Construction Services

## Concessions

**With the qualifications required to offer comprehensive solutions for all types of work, the group includes all the activities that form the construction cycle: from production (extraction of raw materials) through manufacturing, transportation and construction, to final removal (waste disposal or recovery).**

**G**rup Heracles includes companies dedicated to public works and construction throughout Andorra. It has extensive experience and enjoys the prestige that its track record brings, supported by more than 40 years' experience and the execution of some of the country's most emblematic projects.

Grup Heracles has the financial, technical and professional capacity to successfully carry out construction projects for all types of buildings and infrastructure, as well as in managing public services.

Its in-depth knowledge of the needs of its clients, whether professionals in the construction sector, private clients or public institutions, has made Grup Heracles the leading company in Andorra.

Within this sector, the group has extensive qualifications for carrying out both civil works and construction, which includes the following: tunnels, bridges, housing developments, excavations, hydraulic works, stabilisation of land, sports centres, ski slopes.

The coordinated work of the various companies and the cross-cutting nature of its involvement in construction and public works projects have allowed it to offer solutions adapted to each client and to safeguard the environment from the potential impact of the processes and services.

**Experts in 3 main sectors: public works and construction, construction services and waste management.**

Each sector is complemented in order to provide the best solutions for its customers and contributes to the sustainable development of the group.

## Aggregates and quarries

- Quarry management
- Production and transport of aggregates

## Concrete

- Protection and distribution

## Waste management

- Land:** reuse, environmental restoration of quarries, landfill management
- Stone:** reuse, manufacture of aggregates, construction of walls
- Glass/Wood/Plastic:** recovery
- Hazardous waste:** management and transport

## Public works and construction

- Excavations, stabilisations and demolitions
- Construction and special projects
- Centralised contracting

# 14

## ISO certified companies

### The ISO: a management system to achieve excellence

All the companies of the Grup Heracles have the ISO 9001, ISO 14001 and OHSAS 18001 certifications accredited by ICDQ that guarantee the professionalism, commitment and rigour with which the companies carry out their activities.

### members of

## 2. public works and construction

> CG2 Meritxell roundabout

## UNITAS Treballs Públics H

Unitas is the result of the merger of 2 pioneering companies in the Andorran construction sector. The combined experience of the two companies and their long track records give UNITAS a recognised prestige in Andorra and guarantee its ability to provide a comprehensive and professional response to all types of public works: earthworks, containment structures, tunnels, demolitions, hydraulic and road works, underground, slopes and construction.

+40 years' experience

## CEVALLS constructora H

With a high capacity for the execution of projects, the company has carried out some of the most emblematic works in Andorra such as Caldea, the Paris Bridge, the new headquarters of the General Council, the El Diamant building, the Salita Residential Centre, the CG3 roundabout in Escaldes, the Querola and the Soldeu platform, and has endowed each of them with an undeniable seal of quality. CEVALLS is expert in studies and projects, constructions of single-family and multi-family dwellings, industrial and commercial buildings, excavations, earthworks, bridges, tunnels and public works in general.

+28 years' experience

> El Diamant Building

## TREPOSA fonamentacions especials H

The company works within the construction sector and is focused on the realisation of all kinds of special works such as micropiles, the consolidation and stabilisation of land, bar and cable anchors and slope reinforcement, among others. It has highly qualified professional teams, advanced technology machinery that guarantees both the safety of personnel and the preservation of the environment and integration into the landscape.

+25 years' experience

> El Falgueró Car Park

## INACCÉS geotècnica vertical H

Specialists in anchoring and vertical works, indispensable in a country of high mountains such as Andorra: consolidation and protection of slopes, clearing of unstable rocky areas, consolidation of land, prevention of rock slides and avalanches. It offers works and engineering services for the protection of people and infrastructure against geological and natural risks, even in conditions of extreme technical difficulty.

+20 years' experience

> Stabilisation of the Roc del Corb slopes

> Dos Valires Access Tunnel

**The group has built numerous roads, as well as unique elements such as intersections, roundabouts and junctions.**

Due to the mountainous topography of Andorra, it presents complex road engineering solutions, such as anchorage, rockfall mesh protection, masonry walls and anchored walls, among others.

> CG2 Ransol roundabout

> CG2 Encamp extension

> CG2 La Bartra extension

> CG2 Llorcs extension

# developments

> Passeig Gran Valira

Grup Heracles has extensive experience in the construction of developments for both residential and industrial estates.

These developments include the construction of all necessary services: potable water supply, sewage network, electricity and telephony.

**In order to give the work that undeniable seal of quality, Grup Heracles puts all the necessary care into the surface finishes such as the paving of both roads and pavements, and street furniture.**

> Avinguda Meribell

>> Avinguda del Fener

> Avinguda del Fener

> Pont Pla tunnel

> Radio Andorra tunnel

**Grup Heracles has specialised in tunnelling techniques and has also intervened in the restoration, repair and maintenance tasks of existing tunnels.**

Among its staff, Grup Heracles includes the technicians specialising in this type of infrastructure of underground work.

> Dos Valires tunnel

> Dos Valires Access Tunnel

**Grup Heracles has successfully built bridges of all kinds:**

post-tensioned concrete, mixed structure, metal, prefabricated beams, tensioned and with subsequent blasting  
These structures have been used for all types of need: bridges, viaducts and pedestrian footbridges.

> Paris Bridge

> Escaldes-Engordany Roundabout

> Soldeu Skiing Platform

# hydraulic works

> Arinsal Storage Tank

> Arcalis Mini-Hydroelectric Station

**Among the various hydraulic works carried out by Grup Heraclès, there are treatment plants for both drinking water and wastewater, using various technologies, as well as large diameter and varied material conduits.**

Grup Heraclès has also built all kinds of auxiliary elements in these types of facilities such as pumping stations, valves, custom pieces, as well as artificial lagoons and reservoirs.

> Arinsal Storage Tank

> Southern water treatment works

> Falgueró Car Park Excavation

> Chalet Grogues

**Grup Heracles is the leading company in Andorra for excavations of all types, difficulties and scales.**

Realisation of the most complex and largest excavations in the country, with all kinds of specialist means (hammer, ripper, explosives, expansive cement and expansive gas).

The group has a complete machinery fleet and is specialist in all types of excavations, support and demolitions.

> Andorra Telecom building demolition

A company pioneering in complex demolitions in Andorra.

It has the only demolition robot in the country, an electric robot with remote control that considerably increases the safety and performance of workers.

Specialists in manual demolitions with demolition robot, machine and breaker hammer and demolition jaw (up to 13m high).

**Execution of the first work in the country using a LEED management system, an American seal of quality with international prestige.**

# residential building

> Tàpies Building

**Grup Heracles has extensive experience in the construction of residential buildings, always taking great care over both exterior and interior finishes.**

> Ribasol Ski Park Residential Complex

Aspects such as preventing thermal bridges and the correct use of insulation and waterproofing are harmoniously linked to the quality of the materials used.

> El Diamant Building

> La Quirota Building

# non-residential building

> Residencial Salita

> General Council

## Non-residential buildings, both for private and public clients.

Among the numerous buildings by Grup Heracles, there are multi-storey car parks, industrial buildings, offices, commercial premises, as well as landmark buildings and public administration head offices. Grup Heracles also has experience in construction of leisure centres and spas, such as Caldea.

> Petrol Station

> Caldea

> Andorra la Vella Congress Centre

# refurbishments

> Hotel Rosaleda

**Both for reasons of conservation and for the improvement of singular and emblematic houses and buildings, Grup Heracles operates with safety, quality, innovation and the technical exactitude that the work requires.**

Refurbishments, such as the Hotel Rosaleda or historical bridges, demonstrate the quality of the works carried out.

> Improving accessibility in the shopping centre

> Casa Bauseli (before and after)

> Anyós Park Hotel

> Capri Building (before and after)

# slope stabilisation

> Engolasters

**The complicated Andorran mountainous topography has always required the employment of sophisticated techniques to avoid damaging various infrastructure items such as roads or buildings, and to prevent falls of rocks, stones, or avalanches.**

> Roc dels Corbs

The placement of barriers and protective nets, as well as the use of anchors to fix items, are specialties of the Grup Heracles companies.

Today, these protective requirements are widely used, particularly throughout the mountainous regions.

HE 36

HE 37

# sports facilities

> Freestyle Centre

> Ordino Sports centre

Throughout its long history, Grup Heracles has built various sports facilities: sports pavilions, stadiums, stadium stands, skating rinks, swimming pools, gymnasiums and buildings for extreme sports.

> La Massana Football Pitch

> Caldea Padel courts

> Coll de la Botella Service Building

> Àliga Ski Slope (El Tarter)

> Riberal Ski Slope (Grau Roig)

**Grup Heracles has also specialised in the construction and conditioning of ski slopes, some approved by the International Ski Federation (FIS). The Riberal track stands out, approved by the FIS for the one kilometre speed skiing trial.**

It has also built artificial snowmaking networks and buildings connected to the facilities such as high mountain shelters and restaurants and cable car buildings, as well as the civil works of all types of lifts.

Grup Heracles has also executed a landmark work: the Soldeu skiing platform which will host the Skiing World Cup in 2019.

> Pla de la Cot Services Building (Pal, Arinsal)

> Petavit Snow Plant (Grau Roig)

> Soldeu skiing platform

> Tarter Cable-Car Building

> Riba Escorxada Escalators (El Tarter)

> Llac del Cubil Ski Lift (Grau Roig)

# 3. services for construction

# aggregates and quarries

The limestone quarries located in the Alt Urgell region supply Grup Heracles with the necessary aggregates for the production of high quality concretes, as well as for various fillings with selected material. This material is also sold to third parties, for the mentioned uses and for the manufacture of bituminous mixtures of intermediate layers.

This company is dedicated to the production of aggregates for construction. It has a calcareous stone deposit and an aggregate treatment plant.

+30 years' experience

The company is dedicated to the distribution and sale of all types of aggregates for the preparation of mortar, concrete, bituminous mixtures and structural layers for road surfaces, highlighting, among others, washed and dried sand with a grain size between 0.2 mm and 0.4 mm, gravel from 4 to 70 mm, artificial aggregate, gravel, crushing and mixing. The material is supplied by the two quarries that Grup Heracles has in Alt Urgell.

+30 years' experience

> Arids Quarry Alt Urgell

# concrete

Grup Heracles is the most important concrete producer in Andorra, producing all types of concrete and mortar, and meeting both the requirements set out under both the Spanish and French regulations. It provides services to all construction companies and public works companies in the country. It also collaborates with engineering firms to meet all demands and needs, both technically and with new products as required.

The company manufactures and markets concrete in Andorra. As a guarantee of quality, UNIFOR complies with the "structural concrete instruction". Together with the production capacity, it has a major fleet of concrete mixer vehicles in order to distribute the concrete to the point of use, as well as several vehicles with pumps that allow easy access to any supply point.

+35 years' experience

> Contar Plant

# construction waste

Grup Heracles currently has a waste management entity, duly authorised for the management of construction waste and has its own infrastructure to process, store and transport rubble, plastic, iron, wood and all types of construction waste.

**CONTAR**  
HE

A pioneering company in Andorra in the transport, collection, selection and handling of waste from construction, industry, commerce and other public and private organisations. It has a sorting plant where waste is classified in order to improve management, either through recovery within the country or through export to other authorised managers, seeking maximum efficiency in management.

+30 years' experience

# other services

Grup Heracles also has well-established companies in Andorra, closely linked to the construction sector.

**TRANSPORTS**  
DANIEL HE

Since 1985, the company has been engaged in the transport of earth, rubble and aggregates, as well as extraordinary transport using low loaders.

**riba**

**Since 1952**

Materials Riba is the oldest company in the group. It is dedicated to the trade of construction goods and materials, hardware, bathrooms, kitchens and DIY, which means it has extensive knowledge of the needs of both professionals and private customers.

Thanks to its experience and its long history in the sector, Materials Riba has distribution agreements with leading operators that allow it to offer the main brands and the most up-to-date models on the market.

Materials Riba has an exhibition space of more than 1,000 m<sup>2</sup> and has a highly qualified human resources team that offers personalised advice.

> Riba

# 4. waste

**The evolution in the needs of Andorran society regarding the reduction and recycling of waste has meant that this issue has become a priority for the group.**

Thus, Grup Heracles meets the needs of public services and is responsible for the management and treatment of other types of waste (urban solid waste, separate collection and sorting, special collections, oils, WWTP sludge).

**PIRINENCA de SERVEIS**  
Gestió Integral de Residus

The company is responsible for the collection, transport, treatment, export, as well as the disposal when required, of urban and industrial solid waste and its derivatives, including separate collection. It also includes cleaning services for public and private roads.

Since 2016, Pirinenca de Serveis has been the concession holder for refuse collection and separate collection of glass, packaging and paper-cardboard in all the parishes of the Principality.

Pirinenca de Serveis SA has waste management permits in:

- the waste transport category with authorisation to transport waste in approximately 200 categories.
- the waste storage category with authorisation to store waste of mineral and vegetable oils
- various permits for the export of waste.

+20 years' experience

> Separate collection trucks

> Destruction of documents and cardboard compacting

**ECOGRUP**  
Gestió de paper i cartró

It is responsible for waste management in general, industrial and urban cleaning and the marketing of environmental systems.

It also offers a confidential documentation collection and destruction service for both public and private organisations.

+20 years' experience

# 5. concessions

> El Farré Negre

> La Closeta

> Prat del Moli

> Blue zone

## GAVSA

Aparcaments **laMassana** H<sup>E</sup>

Gestora d'Aparcaments de les Valls (GAVSA) is a company dedicated to the comprehensive management of quality car parking in La Massana and has been granted the concession for a period of 50 years.

Currently, it manages more than 1,700 parking spaces within covered and uncovered car parks, squares in blue zone, and offers a personalised service of the highest quality.

With the desire to meet the varied needs of customers (parking by hours, by days or long-term, motor-homes, coaches, subscriptions, Vallnord special or heavy snowfall), GAVSA offers a number of options to facilitate parking in the parish of La Massana.

## REMOPALEX

Maquinària H<sup>E</sup>

Remapalex is a company that carries out the process of differentiation of diesel oil through tracers (dyes) for heating uses.

It is also responsible for the supervision, monitoring and administrative management of the repairs of the vehicle and machinery fleet of the group companies, acting as a specialist purchasing centre.

In addition, it buys, sells and manages all the fuel necessary for the operations of the companies within the group and carries out the administrative management of consumption for the Envalira tunnel and obtains greater savings in purchasing, optimising administrative resources.
